

1 to 4 Fiber Optic Splitter with Green Head

Preview

These 1x4 Wideband Fiber Optic Couplers are designed for splitting a single input signal at 560 nm equally into four output signals. 0 mm narrow key FC/PC or FC/APC connectors. Several center wavelength options are available (see Table 1. Narrowband couplers have a ± 15 nm bandwidth, dual-window couplers have a ± 40 nm bandwidth around. Green Hornet Fiber Optic Splitters offer high reliability, robust performance in a RoHS Compliant compact package. This is achieved using patent pending non-mechanical. 0. Green Hornet Fiber Optic Splitter 1x4 PLC 60x7x4, 1.

1x4 Fiber Optic Splitter GLSUN 1x4 optical splitter is a passive device used in fiber optic networks to divide a single optical signal into four separate paths or, in

GLSUN Single Mode 1x4 Fiber Optic Splitters/Couplers allow a user to split a single input signal evenly into four output signals. This 1x4 coupler can widely used in

The Fiber Optic Splitter 1x4 consists of 1 input and 4 output fibers, ensuring a consistent split ratio across all fibers, regardless of the input wavelength. These

The UFiber Splitter is engineered based on fiber optic splitting technology, which allows a single optical signal to be split into multiple signals, facilitating the distribution of data to multiple endpoints within a

Our fiber optic splitters allow you to quickly and precisely split one strand of fiber into multiple strands saving you time and money.

Hier sollte eine Beschreibung angezeigt werden, diese Seite l sst dies jedoch nicht zu.

Green Hornet Fiber Optic Splitters offer high reliability, robust performance in a RoHS Compliant compact package.

MICRO-SPLITTER 1. Introduction Micro-splitter is stronger of fiber circuit protection than bare fiber splitter, which is a miniaturization result of cassette splitter. It's mainly used for various of connection

CommScope offers a portfolio of bare and connectorized splitters/couplers in a wide range of styles and split ratios, and splitter modules for inside plant (ISP) and

Every fibre optic splitter is manufactured to strict quality standards and is suitable for long-term use in

1 to 4 Fiber Optic Splitter with Green Head

demanding IT and telecommunications environments. Our fibre optic splitters are available with the

The NanoSpeed(TM) Series 1x4 solid-state fiber-optic splitter splits the optical power among four outputs with any power splitting ratio. The input is polarization

Fiber optic splitters enable a signal on an optical fiber to be distributed among two or more fibers. Since splitters contain no electronics nor require power, they are an integral component and widely used in

Compare the Top 15 Fiber Optic Cable Manufacturers of 2026. Discover why ZTO Cable leads in ADSS, OPGW, FTTH solutions, and OTDR equipment with factory-direct value.

These 1x4 Dual-Window Fiber Optic Couplers are designed for splitting a single input signal at 1310 nm or 1550 nm equally into four output signals. The couplers

1x4 Dual-Window Fiber Optic Couplers are designed for splitting a single input signal at 1310 nm or 1550 nm equally into four output signals. The couplers

Versatile Connectivity and Broad Compatibility This fiber optic splitter is designed for seamless integration into existing systems. The 1x4 Planar Waveguide Optical Splitter supports an operating
