These auto-negotiating devices accept a 10/100 Mbps electrical input and convert this to a 100 Mbps optical output. LED indicators confirm. A 100M fiber optic transceiver is a hot-pluggable network component that converts electrical signals into optical signals and vice versa, enabling data transmission over fiber optic cables at Fast Ethernet speeds (100Mbps). Mouser offers inventory, pricing, & datasheets for 100 Mb/s Fiber Optic Transmitters, Receivers, Transceivers. FS offers a range of fast Ethernet 100M SFP transceiver modules, high performance and small form-factor pluggable, which provides flexibility for using fiber Gigabit connections in both data and telecommunication applications. Click to get your 100base sfp transceiver modules from nearby. The Cisco 100GBASE Quad Small Form-Factor Pluggable (QSFP) portfolio offers customers a wide variety of high-density and low-power 100 Gigabit Ethernet connectivity options for data center, high-performance computing networks, enterprise core and distribution layers, and service provider. Moxa compatible SFP-1FESLC-T is SFP (Small Form factor Pluggable) Transceiver, operating over Double Fiber Single-Mode Fiber (SMF) optical cable. It has minimum guaranteed optical budget of 25 dB, with in most cases is enough to reach about 40 km distance.
