288 Core fiber distribution box is made of Galvanized steel with IP53 protection level for FTTH networks. Supports fiber splicing, splitting, and patching. The cabinets adopt SMC enclosure material with an IP65 protection level and are suitable for centralized optical cable cross-connection. The 192/288 Port Fiber Optic Splice Box is a high-capacity outdoor fiber distribution and splicing enclosure designed for FTTH, FTTB, FTTX, and telecommunication backbone networks. OHC have been designed with flexibility in mind and support fusion, pre-terminated and field terminated feed and drop fibers. It allows connection of up to 288 participants in 24 modules with 12 SC adapters. All the modules can be mounted in a hinged frame. Designed to accommodate up to 288 fibers, the FDC is built to withstand harsh outdoor. The precautionary terms used by Corning Cable Systems in its standard recommended procedures conform to the guidelines expressed in the American National Standards Institute document (ANSI Z235) for hazard alert messages.

They can be mounted on pedestals, poles, or walls to provide placement flexibility and are ideal for multi

Hongyou produces all kind of Fiber Distribution Cabinet, Fiber Optic Distribution Cabinet, FTTH Cabinet in large quantity with cost
