

8-core outdoor single-mode fiber optic cable

Article Overview

The 8-Core Outdoor Single Mode Fiber Optic Cable is designed for various applications, featuring:

- o Structure: It typically has a loose tube jelly-filled structure with a metallic strength member and is covered with a corrugated steel-tape armored polyethylene outer sheath .
- o Durability: This cable is moisture-resistant and crush-resistant, making it suitable for aerial applications and harsh outdoor environments .
- o Protection: It includes rodent protection and pulling aids on both ends, ensuring reliable installation and longevity .
- o Applications: Ideal for telecommunications, cloud computing, and smart city applications that require reliable long-term performance .

For more detailed specifications, you can refer to the product pages from the respective sources .
