The 90° Vertical Elbow provides essential support and enables seamless cable management throughout your cable routing system. Class 1: Designed for use with NEMA Classes 12B and 12C cable trays. 'Cable tray' is a formed metal section for supporting cables. It is not only simplifies cable and piping installation, but also enables later additions or modifications without much re-work. These systems have 1 1/8" wide side. This model is a vertical 90 degree up-turn bend transition tray. Standard depth is 4" with optional depth of 6". Model numbers are 12CTU90 (12" wide), 18CTU90 (18"). When developing our cable support OBO can offer reliable solutions for systems, three attributes are at the routing and fastening cables securely core of what we do: efficiency, resil- for each of these installation challeng-ience and safety.

Hubbell's NEXTFRAME™ Ladder Tray is the effective and widely used cable runway that supports and delivers bundles of cable between cabinets, racks, and closets, along walls, and suspended from

Features Contains: One Kit contains hardware for one tee or two 90 degree bends. Slotted Design: fits any size tray and eliminates precise tray
