

Botswana Price for Long-Distance Optical Cable 6 Cores

Article Overview

The price of a 6-core long-distance single-mode optical fiber cable in Botswana typically ranges from USD 0.50 to USD 1.50 per meter, depending on specifications, supplier, and installation requirements.

Cable Specifications

For long-distance applications, single-mode fiber is preferred due to its low attenuation and ability to transmit signals over tens of kilometers without amplification . A standard 6-core single-mode cable often features:

- o Outer diameter: ~5.8 mm
- o Reinforcement: Fiber Reinforced Plastic (FRP) and yarn for durability
- o Indoor/outdoor suitability: Armored or LSZH jackets recommended for outdoor deployment
- o Transmission distance: Single-mode fiber can reach several kilometers to hundreds of kilometers with proper amplification

Price Considerations

- o Cable Type: Single-mode cables for long-distance use are more expensive than multimode cables due to higher performance and lower signal loss .
- o Length: Bulk purchases reduce per-meter cost; shorter runs may incur higher unit prices.
- o Supplier and Import Costs: Botswana is landlocked, so shipping and import duties can increase costs .
- o Installation: Outdoor or long-distance deployment may require armored cables, conduits, and professional installation, adding to total cost.

Market Insights in Botswana

- o Demand is concentrated in Gaborone, Francistown, and mining regions, driven by data centers, telecom networks, and industrial automation .
- o Suppliers often provide custom quotes based on project length, cable type, and environmental requirements.
- o Local distributors may include Cable IT Botswana and international suppliers shipping to Botswana .

Practical Guidance

- o For long-distance backbone networks, choose single-mode 6-core cables with armored or outdoor-rated jackets.
- o Request quotes from multiple suppliers to account for shipping, import duties, and installation costs.
- o Consider future-proofing by selecting cables with higher bandwidth ratings and LSZH or fire-resistant materials. In summary, while exact prices vary, expect USD 0.50-1.50 per meter for a 6-core long-distance
