

Cable tray laying corner wheel

Preview

Our Corner Roller is designed for efficient underground and trench cable laying, ensuring smooth and safe cable bending at corner sections. Designed for Wire Wheel(R) Model 415D wire dispenser has 2 wheels that hold 250' rolls of NM Cable. This is the ORIGINAL- MADE IN THE USA! Need help? Cable rollers are essential tools in construction, electrical installation, and industrial operations, designed to guide and support cables during deployment. They help reduce friction, prevent kinking, and protect cables from abrasion and damage--especially during long-distance pulls or complex. This is a heavy duty corner cable roller for use in most cable laying applications. They can be used singularly or linked together using link pins to form a full bend. Cable Block Frames are used to support either the E Cable Block (GMP74055) or Self Support Cable Block (GMP70200) when pulling in prelash or self. When laying cables in industrial and plant engineering as well as tunnel systems, the cable has to be routed safely over corners and edges. Traction forces are difficult to meter.

Description Cable Tray Corner Roller (L Model) Galvanised Finish: Provides excellent corrosion resistance, ensuring durability in harsh environments. **Portable and Easy Installation:** Lightweight and

Ontides is one of the leading manufacturer and supplier of cable laying equipments, cable pulling winches and trailers, cable rollers and guides in UAE.

Designed for professional cable laying operations, this roller helps maintain the correct bending radius and prevents cable sheath damage at critical corner positions.

Trailer & Winch Solutions" Cable Rollers for most cable laying applications. Category includes Corner, Hanging, Manhole Entry and other rollers.

Explore the types of cable trays, their advantages, applications, and standard sizes. Learn how they improve cable management and support various industries.

This cable pulling roller can be installed on the inside or outside of the track, or the corner of the track. The rod can through smoothly with the help of
