

Dutch-style cable trays are of good quality

Article Overview

Stago and Gouda Holland cable trays are highly recommended Dutch-manufactured systems offering robust, flexible, and safe cable management solutions.

Stago Cable Trays

Stago cable trays are manufactured in the Netherlands and are known for their strength, flexibility, and installation efficiency. They feature double return flanges and reinforced tray designs, providing high load capacity, excellent stiffness, and enhanced cable safety, even in demanding industrial or commercial installations. The system includes perforated, reinforced, and closed tray designs, with multiple heights, widths, and thicknesses available. Stago trays are certified for fire resistance (E30, E60, E90) and support equipotential bonding through the Unilock coupling system, ensuring electrical continuity. They are suitable for power and data cable routing in commercial buildings, data centers, and industrial facilities.

Gouda Holland Cable Ducts

Gouda Holland offers Tray and Lock cable ducts, available in closed and perforated versions for maximum cable protection and flexible routing. The Tray system is considered light duty, with continuous longitudinal slot perforations following EMC guidelines, while the Lock system is available in medium (OK3) and heavy duty (OK6) versions. These systems are widely used in industrial, machine, and marine applications, with spans of 3 to 6 meters for versatile installation. Materials include steel, aluminum, and glass fiber reinforced polyester (Poly Niedax EBO), providing options for corrosion resistance and mechanical strength.

Key Considerations

- o Material: Steel, aluminum, PVC, or GRP depending on load and environmental conditions.
- o Installation: Both Stago and Gouda Holland systems are designed for quick assembly with integrated couplings and fittings.
- o Fire Safety: Stago trays are certified according to DIN4102-12 for fire resistance, suitable for high-risk environments.
- o Flexibility: Perforated and modular designs allow easy cable separation, routing through corners, and vertical or horizontal bends.
- o Compliance: Both systems meet European standards for cable support and management, ensuring safe and reliable installations. For Dutch-style cable tray installations, Stago is ideal for high-load, industrial, and commercial projects, while Gouda Holland provides versatile duct solutions for light to heavy-duty applications, including marine and machine-building environments. Both systems offer robust, future-proof cable management with local manufacturing ensuring quality and availability.

Dutch-style cable trays are of good quality

Key information in brief: Cable trays are used for guiding, protecting, and organizing cables in electrical,

Cable trays are components of support systems for power and communications cables and wires. A cable tray system supports and

Steel, aluminium, PVC and GRP cable support systems and a full range of accessories - the extensive

Generally the MS Cable Trays are painted or powder coated for rust resistance and longer life. It also give good look

In the intricate world of electrical and data management, cable trays play a pivotal role in ensuring the safe, organized, and efficient

Dutchclamp manufactures fiberglass reinforced polyamide cable clamps for low, medium and high voltage cables,

Improved Cable Management: Cable trays help to organize and separate different types of cables, reducing the risk of tangling or

We manufacture a wide range of products capable of providing the characteristics which respond to the proposed application, along

Explore the full range of Stago cable trays manufactured in the Netherlands. From light-duty KG281 to ultra-durable ES114 stainless

Explore the world of cable trays, their types, materials, benefits, standards, and installation

The best cable management depends on your environment and goals. See how trays,

With cable duct (Tray or Lock) you ensure maximum protection and the cables are routed out of sight. Available in both closed and

Explore all types of cable trays--ladder, perforated, basket, solid, and channel. Learn their

Discover cable trays in various materials for safe and neat cable routing. Durable, versatile and suitable for any environment!

Dutch-style cable trays are of good quality

Cable tray systems are engineered support structures designed to route, support, and protect insulated electrical

With various DNV Type Approved solutions, Gouda Holland offers a reliable and high-quality series of solutions. Gouda Holland
