

Article Overview

Egypt offers a wide range of high-density network cabinets from leading suppliers like Schneider Electric, Masar Engineering, Kimo Store, and U-Rack, suitable for data centers and enterprise IT infrastructure.

Key Suppliers and Offerings

1. **Schneider Electric Egypt** Schneider Electric provides a comprehensive range of racks and enclosures designed for high-density server environments. Their products include APC NetShelter SV, SX Advanced Enclosures, Easy Racks, and Micro Data Centers. These cabinets offer enhanced airflow, cable management, and power distribution, and are optimized for AI workloads, integrated liquid cooling, and edge computing applications. Custom solutions allow businesses to select sizes, colors, and configurations to meet unique IT requirements . 2. **Masar Engineering Industries** Masar offers an extensive selection of network racks and cabinets for both server and networking equipment. Their solutions focus on efficient operation, minimizing downtime, and protecting IT infrastructure. They provide options suitable for high-density deployments, ensuring scalability and reliability for enterprise networks . 3. **Kimo Store** Kimo Store supplies floor-standing and wall-mount cabinets ranging from 2U to 42U, supporting high-density setups. Their cabinets from brands like Perla, Zvision, and Omega feature superior ventilation, cable management, and durable construction, making them ideal for data centers and network closets . 4. **U-Rack** U-Rack specializes in indoor and outdoor server rack cabinets with IP66-rated protection for outdoor environments. Their indoor cabinets are designed for precision, security, and cable management, while outdoor cabinets protect equipment from dust, water, and harsh weather. U-Rack also offers customization options for port density, size, and configuration, making them suitable for high-density optical fiber and networking deployments . 5. **Anixter Egypt** Anixter provides a broad portfolio of racks, cabinets, and enclosures, catering to enterprise and data center needs. Their offerings include modular and pre-configured solutions for high-density IT infrastructure, ensuring flexibility and scalability .

Features to Consider for High-Density Cabinets

- o **Scalability:** Ability to expand as network demands grow.
- o **Airflow and Cooling:** Optimized for heat dissipation in dense server environments.
- o **Security:** Lockable doors and robust enclosures to protect critical equipment.
- o **Customization:** Options for size, port density, and integrated power distribution.
- o **Indoor vs Outdoor:** IP-rated cabinets for outdoor deployments to withstand environmental conditions. These suppliers collectively provide a franchise network of high-density cabinet solutions in Egypt, suitable for data centers, enterprise IT rooms, and distributed network applications. Businesses can select from pre-configured or fully customized enclosures to meet specific operational and environmental requirements.
