This 7" small conduit box--also called a wire access box or electrical junction box--is a purpose-built custom metal component designed for routing electrical wiring within hollow metal door and window frames. It features a pre-punched knock-out for simplified cable management, helping ensure code. Frame Frog's universal product design offers an easy method of installing conduit in door frames for electronic locks, strikes, card readers, and other typical devices of a wired access control system. The versatile FRG4L can be used in any frame location but is the product of choice for electric. Shop commercial door electrified exit devices and panic bars. Order today and receive FREE shipping. INOX power transfer solutions provide a reliable and secure way to deliver power to electrified door hardware, ensuring seamless operation without exposed wiring. Designed for durability and ease of use, these solutions address key customer challenges in demanding environments.

The first blackbox specifically designed for electrified door hardware in hollow metal door frames. Frame Frog's universal product design offers an easy method of
