

Article Overview

For explosion-proof distribution boxes in Ethiopia, international manufacturers like Warom, MINMILE, and CZ Electric provide certified products compliant with ATEX, IECEx, and other global standards, while SGS Ethiopia offers local certification services.

Key Manufacturers

- o Warom Group: Specializes in explosion-proof electrical equipment including distribution boxes, control systems, and lighting. Their products comply with IEC, ATEX, and IECEx standards, suitable for hazardous industries such as petroleum, chemical, marine, and mining sectors .
- o MINMILE: Operates as a factory and supplier of explosion-proof device boxes, offering customizable enclosures for temperature control, power supply, and integration of instruments like ammeters and voltmeters. They provide various mounting options and cable entry types for hazardous areas .
- o CZ Electric Co., Ltd.: A Chinese manufacturer with over 30 years of experience, producing explosion-proof isolation switches, safety switches, MCB boxes, and distribution boards. Their products have obtained ATEX EU and IECEx certifications and are designed according to IEC international standards .
- o R. STAHL: Offers custom and standard terminal boxes for hazardous areas, certified for global installation, ensuring safe energy distribution in explosive atmospheres .

Certification Services

- o SGS Ethiopia: Provides explosion-proof certification services for equipment intended for use in explosive atmospheres. They support compliance with ATEX, IECEx, TR CU (EAC), MSHA, and USTC standards, enabling manufacturers to trade globally. SGS can assist with multi-country approvals and verification processes, including document review and laboratory testing .

Considerations for Ethiopia

- o Ensure that the distribution boxes meet ATEX or IECEx standards, which are widely recognized internationally and suitable for hazardous zones in Ethiopia.
- o Verify that the supplier can provide documentation and certification for compliance with local safety regulations.
- o Consider customizable options for cable entries, mounting types, and integration of monitoring instruments to match specific industrial requirements.
- o Engage with certification agencies like SGS Ethiopia to validate compliance before installation in hazardous areas. By sourcing from these manufacturers and ensuring proper certification, Ethiopian industries can safely deploy explosion-proof distribution boxes in environments such as oil refineries, chemical plants, and mining
