

Article Overview

Fiber optic jumper node prices vary widely, typically ranging from \$5 to over \$100 per unit depending on type, length, connector, and customization options.

Pricing Overview

- o **Standard Singlemode or Multimode Jumpers:** Basic fiber optic jumpers with common connectors (SC, LC, ST) generally start around \$5-\$20 for short lengths (1-3 meters) and standard configurations (National Data Supply, Mouser) .
- o **Longer or Multi-Fiber Assemblies:** Duplex or multi-pair jumpers, or lengths exceeding 10 meters, can range from \$20 to \$100+, depending on fiber type (OS1/OS2 singlemode or OM3/OM4 multimode) and jacket specifications .
- o **Custom or Armored Jumpers:** Factory-terminated, armored, or outdoor-rated jumpers designed for harsh environments, such as SC/APC or LC-UPC OSP assemblies, may cost \$50-\$150 or more, especially for 6-12 fiber nodes or specialized configurations (Multilink) .
- o **High-Performance or 10 Gigabit Assemblies:** Jumpers designed for 10G networks or high-bandwidth applications are priced higher due to precision connectors and low-loss fiber, often \$30-\$120 per jumper .

Suppliers and Ordering Options

- o **Mouser Electronics:** Offers a wide range of jumper fiber optic cable assemblies with datasheets and inventory for immediate purchase .
- o **Amazon:** Provides consumer-accessible fiber optic jumpers, typically for short lengths and standard connectors, with multiple buying options .
- o **Multilink:** Allows online configuration of custom jumpers, including armored and multi-fiber node assemblies, with fast quote and shipping options .
- o **National Data Supply:** Stocks extensive singlemode and multimode jumpers, including custom lengths up to 5000 feet, with same-day shipping for many items .
- o **Corning:** Offers factory-terminated assemblies with a 2-day lead time for standard jumpers and high-fiber-count assemblies, suitable for enterprise or telecom deployments .

Key Considerations

- o **Connector Type:** SC, LC, ST, MTRJ, or custom connectors affect price.
- o **Fiber Type:** Singlemode (OS1/OS2) is generally more expensive than multimode (OM3/OM4).
- o **Length and Jacket:** Longer cables or specialized jackets (armored, outdoor-rated) increase cost.
- o **Customization:** Custom configurations, multi-fiber nodes, or high-performance assemblies will significantly raise the price. For accurate pricing, it is recommended to request a quote from suppliers like Multilink or
