Over the past few years, telecom operators embarked on a large-scale roll-out of fiber-optic in the Netherlands. The Telecom Monitor for Q4 reveals that, so far, 8.26 million fiber-optic connections have been installed, and that plans have been taken out at 3. These newcomers, such as Reggefiber (later acquired by KPN) and CIF (Cooperative Internet Federation), focused on building fiber networks in underexplored areas (mostly outside the Randstad), promoted competition and pushed the boundaries of fiber coverage. The 2010's saw an increase in fiber. For over 25 years, Eurofiber Group has been building a neutral, interoperable network across Europe. We own eleven data centers and connect to more than 300. Fiber installation involves a few clear steps.
