

Fiber optic connection to router LAN port

Preview

Connect the fiber optic cable from your ISP to the ONT (Optical Network Terminal) provided. Power on all devices and configure your router for the internet connection. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). If you're looking to understand how to connect fiber optic cable to router, you've come to the right place. After conversion, the ONT outputs the data via a standard Ethernet port, which is the designated interface for connecting. I have a fibre optic cable incoming to an ONS, on the way out of the ONS is also a fibre optic cable which goes directly into a router which has a fibre optic port.

Use SFP media converter, which can convert RJ45 electrical signal into optical signal
