PON technologies, unlike Ethernet, are not P2P but one-to-many with two device types: ONU (Optical Network Unit)/ONT (Optical Network Terminal) and OLT (Optical Line Terminal). Both devices can be manufactured using the SFP form factor 1. The OLT provides an integrated access box for Passive. PLANET GPN-SFP is an SFP GPON ONU device designed in compliance with the ITU-T G. It is a cost-effective GPON customer premises system that provides broadband services with 1244 Mbps upstream and 2488 Mbps downstream by connecting to subscribers' switches or routers. It is a "PON on a Stick" that an entire FTTH ONU in a slightly oversized SFP.
