In 2020, the government announced that fibre optics would be rolled out nationwide by 2025. Fibre optics offer higher speeds than the historic copper network, at a time when teleworking, e-education, e-health and other uses have increased the need for connectivity². Arcep publishes a study that analyses the impact of the regulatory framework for FttH networks in France: positive assessment confirmed Today, Arcep is publishing a study carried out by a consulting firm, Plum, whose remit was to provide an assessment of the French regulatory framework that has. According to ARCEP's Q4 2025 observatory published on 12 March 2026, 40.1 million subscriptions are already on FTTH. Here is what that means in practice: eligibility, installation, copper shutdown and what to do. The phase-out of ADSL has been implemented since 31 January 2025. The historical copper network that the technology relies on, which provides the telephone, internet and television, is gradually disappearing in favor of fiber optics. ADSL has been. This guide explains how to test your eligibility, understand the different technologies, and choose the right operator. Fiber optic (FTTH - Fiber To The Home) in France in 2026 delivers download speeds from 300 Mbps up to 8 Gbps depending on plan, with low latency. Announced in 2013, the France Superfast Broadband Plan (Plan France tres haut debit - PFTHD) set the goal of covering the entire country with very high-speed broadband (connection of more than 30 Mbps) within ten years, regardless of the technology chosen¹.

CAP FIBRE is a dedicated service provider for high-speed fiber optic networks, focusing on the deployment and operation of these

As of January 31, 2026, 26,000 municipalities will stop the marketing of new copper offerings. For the other municipalities not yet

The French optical fiber cables market stands as a critical and dynamic component of the nation's digital

Tout savoir sur le d ploiement de la fibre optique FTTH en France : couverture par commune, d partement et r gion, historique et

En juillet 2026, le d ploiement de la fibre optique en France couvre plus de 94,6 % des locaux. Selon l'Arcep, la France compte 27,7

With the closure of copper, fibre optics will soon become the benchmark fixed telecommunications infrastructure in France.

Recent attacks on fiber optic cables in France have underscored how exposed modern communications networks can be, even in

Modern fiber-optic communication systems generally include optical transmitters that convert electrical

Fibre broadband is a type of high-speed internet which uses fibre optic cables rather than copper cables to transfer

In France, fiber optic deployment has accelerated significantly in recent years, as part of the France Very High Speed

Shared Optical Local Loops Since deployment of fibre networks began in 2007, Orange has been the leading provider of Fibre To

Everything you need to know about fiber optic in France: eligibility, technologies, speed, and installation. A complete

France Fibre Optic Cable Market 1.96 USD Billion by 2035. Driven by internet demand, tech advances, and

Suivez le d  ploiement de la fibre dans votre commune, ou dans votre rue et v  rifiez si la fibre optique est d  j  ;

For instance, GIA provisions enable telecom operators to collaborate with public works projects to install fibre optic cables

Complete guide to fiber optic installation in France: eligibility, duration, costs, steps, and expert tips for optimal
