

Article Overview

Hensel, JEAN MULLER, ELSTA Mosdorfer, and Driescher Elektrotechnische Werke are leading German manufacturers of Class II low-voltage distribution boxes.

Hensel

Hensel is a family-owned company with over 90 years of experience in low-voltage switchgear assemblies. They manufacture low-voltage distribution boards up to 1600 A, designed for industrial, commercial, and photovoltaic applications. Hensel emphasizes EMC-friendly designs, project-specific prefabrication, and fully automated production processes to ensure consistent quality. Their products comply with relevant safety standards and are suitable for Class II applications, providing reliable insulation and protection against electric shock (Hensel) .

JEAN MULLER

JEAN MULLER offers a wide range of enclosures and low-voltage distribution boards, including service entrance boxes, small distribution pillars, and standard cable distribution cabinets. Their products can be supplied empty or fully equipped, and they are designed according to DIN EN 61439/DIN 43629, meeting the requirements of distribution network operators and industrial applications. JEAN MULLER provides customized solutions with in-house components and consulting for Class II compliant installations (JEAN MULLER) .

ELSTA Mosdorfer

ELSTA Mosdorfer specializes in distribution cabinets for utilities and public networks, including low-voltage switchgear assemblies. Their enclosures are designed to withstand outdoor conditions, prevent condensation, and ensure operational reliability. They follow the IEC 61439 series of standards, covering domestic and industrial low-voltage distribution systems. ELSTA Mosdorfer offers scalable cabinet systems suitable for Class II applications, combining safety, durability, and modularity (ELSTA Mosdorfer) .

Driescher Elektrotechnische Werke

Driescher Elektrotechnische Werke manufactures low- and medium-voltage switchgear and distribution boxes from 0.4 kV to 38.5 kV/52 kV. With a strong focus on innovation and quality, their products are developed and produced entirely in Germany. They offer modular systems that can be customized for individual requirements, ensuring compliance with Class II insulation standards and providing future-proof solutions for industrial and infrastructure projects (Driescher) . These manufacturers are recognized for their high-quality

German manufacturer of Class II low-voltage distribution boxes

engineering, compliance with international standards, and extensive experience in low-voltage distribution systems, making them reliable choices for Class II low-voltage distribution boxes in Germany.

HENSEL ist marktführendes Unternehmen im Bereich innovativer Produkte und Dienstleistungen für die Gebäudeausrüstung.

Compact DIN Rail power supplies (30-100W) with Class II, NEC Class 2 / LPS, OVC III & DOE VI. Ideal for DIN Rail mounting in

A low voltage distribution box is an essential component used to receive, control, and distribute electrical power within systems

Electrical boxes ABB provides the highest-quality, most versatile, innovative and comprehensive line of metallic, non-metallic, indoor,

Fusegear (low voltage) Fuses (medium voltage) G Gas insulated switchgear (medium voltage) Grid automation I i-bus KNX Industrial

Used for strong current connection of high voltage distribution box, all-in-one controller, battery box and

Low-maintenance The cover over the meter space in the connection cabinets and connection distributor cabinets can be removed

ABB Low voltage distribution system offers safe and reliable distribution based on InLine ZLBM fuse switch disconnecter. It's a full

Power distributor - Energy distributor on construction sites ELKRAFT®; stands for power distributors - power distributors on

Yet the distribution box is a highly complex component that not only ensures safe power distribution, but is also responsible for

Explore the top 7 electrical cabinet manufacturers in Germany, including Eabel and Stareco GmbH, known for

Wherever dusty and humid environmental conditions place high demands on the electrical installation, products of highest quality

Low voltage network distribution and connection solutions. CAHORS has solid expertise in developing and

German manufacturer of Class II low-voltage distribution boxes

manufacturing low

We offer to make all kinds of distribution boxes. Starting with small local control panels up to large automation cabinets in

igus®; SE & Co. KG. is a developer and manufacturer of plastic energy chains, highly flexible cables for dynamic applications in

The robust enclosures developed, manufactured and distributed by HENSEL are suitable as universal encapsulation to fulfill many
