

Article Overview

The typical price of GYTS armored fiber optic cable ranges from \$0.35 to \$0.45 per meter, depending on fiber count, jacket material, and order quantity.

Price Overview

GYTS cables are single loose-tube outdoor armored fiber optic cables designed for durability in harsh environments. Factory and wholesale pricing generally falls between \$0.35-\$0.45 per meter, though prices can vary based on specifications such as fiber count, fiber type, and jacket material . Higher fiber counts (24 cores and above) increase material usage and manufacturing costs, leading to higher prices .

Factors Affecting Cost

- o Fiber Count: More fibers increase cable diameter and material cost.
- o Fiber Type: Options like G.652.D, G.657A1, or G.657A2 can influence pricing .
- o Jacket Material: Polyethylene (PE) is standard, but specialized jackets for extreme conditions may raise costs.
- o Installation Environment: Direct burial or underground installations may require additional water-blocking or protective layers, slightly increasing the price .

Ordering and Customization

- o Minimum Order Quantity (MOQ): Most manufacturers require at least 1 km per specification .
- o Custom Lengths: Standard reels are typically 2 km or 4 km, but custom lengths can be requested to reduce waste .
- o Wholesale Options: Bulk orders often receive competitive pricing directly from manufacturers .

Additional Considerations

GYTS cables are armored with corrugated steel tape, providing rodent protection and mechanical strength, making them suitable for duct and aerial installations. For harsh soil conditions or heavy direct burial, double-armored cables like GYTA53 are recommended . For precise pricing tailored to your project, it is recommended to contact suppliers directly with your fiber count, cable length, and installation requirements to receive a detailed quote .
