

High-density edge data centers in the Netherlands

How big is the Netherlands Data Center Market?

The Netherlands Data Center Market size is expected to reach 1.31 thousand MW in 2024 and grow at a CAGR of 2.61% to reach 1.49 thousand MW by 2029...

What is the current Netherlands Data Center Market size?

In 2024, the Netherlands Data Center Market size is expected to reach 1.31 thousand MW. [Read More](#)

Who are the key players in Netherlands Data Center Market?

EdgeConneX, Inc., Equinix, Inc., Evoswitch International B.V., Iron Mountain Incorporated and SD Data Center are the major companies operating in...

Which segment has the biggest share in the Netherlands Data Center Market?

In the Netherlands Data Center Market, the Tier 3 segment accounts for the largest share by tier type. [Read More](#)

Which is the fastest growing segment in the Netherlands Data Center Market?

In 2024, the Tier 4 segment accounts for the fastest growing by tier type in the Netherlands Data Center Market. [Read More](#)

What years does this Netherlands Data Center Market cover, and what was the market size in 2023?

In 2023, the Netherlands Data Center Market size was estimated at 1.25 thousand MW. The report covers the Netherlands Data Center Market historical...

There are 105 data centers in Netherlands from 20 colocation providers including Cellnex, IPTP Networks, Microsoft (Azure). Browse and compare facilities by power capacity, connectivity, and pricing on OCOLO. Need Help Finding a Data Center? The data center is strategically located west of Amsterdam's city center, just off the A5 motorway and the A10 ring road, and is only 20 minutes by car from Amsterdam Schiphol Airport, providing excellent connectivity and accessibility. The Amsterdam I data center offers 2,237 m² of edge data. The Netherlands Data Center Market Report is Segmented by Data Center Size (Large, Massive, Medium, Mega, and Small), Tier Type (Tier 1 and 2, Tier 3, and Tier 4), Data Center Type (Hyperscale/Self-built, Enterprise/Edge, and Colocation), End User (BFSI, IT and ITES, E-Commerce, Government). The nLighten edge data center in Amsterdam (AMS2) is a high availability and secure facility with 4,800 m² of dedicated colocation space and 3,600 kW of power. The campus is operational and power banked for up to five data centers capable of more than 100MW of power and over 44,000 m² of building space capacity with a mix of multi-tenant colocation and build-to-suit and Cloud connectivity. And EdgeConneX has a proven track. Switch Datacenters designs, builds and operates high density sustainable datacenters in Europe. Each datacenter is engineered for continuous. Find all DDA data centers on the most up-to-date data center map in the Netherlands.

Explore the nLighten Edge Data Center in Amsterdam, Netherlands, offering high-density power, advanced

High-density edge data centers in the Netherlands

sustainability, and superior security. With state-of-the

CEO: Rutger de Haij Founded: 2014 Headquarters: The Netherlands Asperitas is a high-tech company that provides cutting edge immersion cooling

The new systems bring the acceleration power of NVIDIA RTX PRO 4500 Blackwell Server Edition GPUs in form factors which are optimized for

Broadcom, efficiently facilitates high-density and power-efficient optical interconnects commonly available in hyperscale data center networks and

From the heart of Amsterdam to other digital hubs across Europe, Switch Datacenters designs, builds, and operates high-density, AI-ready facilities. Each datacenter is engineered for continuous

TI's 800 VDC power architecture maximizes conversion efficiency and power density across the entire power path, enabling more scalable and reliable AI data center operations.

Netherlands Data Center Market size was valued at USD 1951.5 Million in 2024 and is projected to reach USD 2005.8 Million by 2032, growing at a CAGR of 3.7%

Data Facilities Data Centers is a leading carrier-neutral data center operator based in The Netherlands. Our company specializes in providing world-class data center solutions for businesses of all sizes,

The European Data Center Cooling Market, valued at USD 2.1B in 2023, is projected to reach USD 3.41B by 2029, growing at a 8.4% CAGR.

We operate edge data centers distributed across Europe's key economic hubs. These allow excellent low latency network access for local industry, private users and the mobile workforce.

A practical guide to integrating high-density liquid cooling within existing air cooled data center environments.

Explore the nLighten Edge Data Center in Amsterdam, Netherlands, offering high-density power, advanced sustainability, and superior security. With state-of-the-art infrastructure and extensive

Supermicro introduces AI servers featuring NVIDIA HGX B300 GPUs and liquid cooling technology, reducing data center power by 40%. New

The Data Center Liquid Cooling Market refers to the industry focused on advanced cooling technologies that use liquids instead of traditional air-based systems to manage heat generated by high

High-density edge data centers in the Netherlands

Soaring demand for AI data centers has ushered in a new area of growth. We explore these new opportunities for companies and investors across

Introducing 4U and 2-OU (OCP) liquid-cooled NVIDIA HGX B300 systems for high-density hyperscale and AI factory deployments, supported by
