

How much does a ladder-type galvanized cable tray cost

Article Overview

Ladder-type galvanized cable trays typically cost between \$20 to \$60 per 2.4-meter section, depending on material, thickness, and supplier.

Pricing Overview

The cost of galvanized ladder-type cable trays varies based on factors such as material quality, tray width, rung spacing, and whether the tray is hot-dip galvanized or pre-galvanized. Standard 2.4-meter lengths are commonly used in industrial and commercial installations . Prices for these trays generally range from \$20 to \$60 per section, with fittings like bends, tees, and risers sold separately on a per-piece basis .

Material and Durability

These trays are usually made from steel coated with zinc to resist corrosion, making them suitable for both indoor and outdoor applications . Hot-dip galvanized trays offer enhanced durability and are ideal for heavy-duty installations, while pre-galvanized trays may be slightly less expensive but still provide corrosion protection .

Supplier Options

- o IndiaMart lists multiple manufacturers and suppliers of GI ladder-type cable trays across India, providing options for bulk purchases and custom sizes .
- o Alibaba offers a variety of galvanized ladder-type trays suitable for industrial and commercial projects, often with customizable dimensions and configurations .
- o McMaster-Carr provides ready-to-ship ladder cable trays, including heavy-duty and open designs, with same-day or next-day delivery for urgent projects .

Additional Considerations

When budgeting, consider the cost of fittings (elbows, tees, reducers) and installation hardware, as these can add to the overall project cost. The open ladder design also facilitates heat dissipation and easy cable maintenance, which can reduce long-term operational costs . In summary, for a standard 2.4-meter hot-dip galvanized ladder tray, expect to pay \$20-\$60 per section, with additional costs for fittings and installation. Prices may vary by supplier, material thickness, and regional availability .
