

How to check the fiber optic speed of a router Mbps

Preview

For an accurate test, plug a Cat6 cable directly from your router or ONT into your computer. Pause them before testing to see your connection's true capacity. Fiber optic internet transmits data as pulses of light through glass strands, unlike cable internet which uses electrical signals through. Verify your Jio Fiber, Airtel Xstream, or BSNL FTTH plan speed. Use a Speed Test Tool Online Speed Test Websites: Many websites allow you to test your connection. How Much Speed Do You Need? (C) 2006- 2026 Ookla, LLC. Ookla (R), Speedtest (R), and Speedtest Intelligence (R) are among the federally registered trademarks of Ookla, LLC and may only be used with explicit written permission. Use Speedtest on all your devices. How to find out your technology? On your ISP's website, in the "line status" or "technical details" section. Or look at your modem: SC/APC fiber port = FTTH, RJ-11 phone port = FTTC/ADSL.
