

How to connect the fiber optic router provided by the cable TV company

Preview

Use an Ethernet cable to connect the ONT to the router's WAN port, ensuring a secure connection. Access the router's settings through a web browser and follow Spectrum's instructions to configure it. To connect your fiber optic cable to a router, ensure you have the following: Fiber optic modem (ONT): Most fiber connections require an Optical Network Terminal (ONT), provided by your ISP. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). This guide details the necessary physical and digital steps to connect your fiber line and activate your internet service.

The fiber-optic cable connecting the ONT to the entry point is glass, so it doesn't bend like copper cable. Moving the
