

Article Overview

Huijue Optical Modules encompass a wide range of fiber optic components and integrated energy storage solutions for residential, commercial, and industrial applications.

Overview of Huijue Optical Modules

Huijue Group, founded in 2002 and headquartered in Shanghai, is a leading manufacturer of fiber optic components and optical modules, offering products such as LC duplex connectors (single-mode), SC simplex connectors (multimode), optical splitters, fiber optic adapters, and fiber optic cables . These modules are designed for high performance, reliability, and compatibility with modern communication networks, including FTTX solutions, data centers, and digital integrated site power systems .

Product Categories

- o Fiber Optic Connectors and Adapters: High-quality connectors like LC, SC, and customized adapters for single-mode and multimode fibers, supporting precise signal transmission .
- o Optical Splitters: Devices that divide optical signals efficiently for network distribution, suitable for FTTX and telecom applications .
- o Fiber Optic Cables and Bundles: Durable cables for indoor and outdoor deployment, supporting high-speed data transmission and long-distance connectivity .
- o Active Optical Components: Modules integrated with electronics for signal amplification, monitoring, or switching, enhancing network performance .

Integration with Energy Storage

Huijue's optical modules are often integrated into optical-storage-charging systems, forming part of microgrid energy storage solutions. These systems combine photovoltaic power generation, energy storage batteries, and charging piles, enabling efficient energy capture, storage, and distribution for residential, commercial, and telecom applications . The modules support high-efficiency energy transfer, ensuring stable operation of off-grid and on-grid systems.

Applications

- o Telecom Base Stations: Optical modules provide reliable connectivity and integrate with backup power systems for uninterrupted service .
- o Data Centers: High-speed fiber optic modules ensure low-latency, high-bandwidth connections for critical infrastructure .
- o Residential and Commercial Energy Storage: Optical modules facilitate monitoring and control of energy

Huijue Optical Module Genuine and OEM Products

storage systems ranging from 5 kWh to 20 kWh for homes and up to 30 MWh for industrial applications .

o Microgrids and EV Charging: Modules enable seamless integration of solar energy into microgrids and electric vehicle charging stations, optimizing energy efficiency .

Customization and Services

Huijue offers OEM/ODM services, allowing clients to customize optical modules and fiber optic solutions according to specific project requirements. Small orders, including single-piece samples, are supported, making it flexible for both prototyping and large-scale deployment . The company maintains strict quality control and a robust R&D capability to ensure high performance and reliability across all products .

Global Reach

Huijue's optical modules and energy storage solutions are exported worldwide, including Europe, North America, and Southeast Asia, supported by multiple production bases and subsidiaries to ensure timely delivery and technical support . In summary, Huijue Optical Modules provide a comprehensive suite of fiber optic components integrated with advanced energy storage solutions, suitable for telecom, data center, residential, and industrial applications, with strong customization options and global support.

HG Genuine is the only manufacturer possessing the complete production lines of epitaxy, chip fabrication, device and module in
