

Intelligent AI Server Shell

Preview

Microsoft AI Shell is an interactive, AI-powered command-line experience that integrates directly with PowerShell, Windows Terminal, and iTerm2. Real-time streaming shows the script being written. A built-in diff view highlights exactly what changed. A summary tab. Transform your DevOps workflow with intelligent automation. Let AI write scripts, orchestrate tasks, and manage servers through natural language -- via Telegram, Discord, DingTalk, or web interface. AI generates optimized scripts. Shell is launching our RechargePlus solution, and it's all about really how you optimize charging for their electric vehicle. Today, Warp's AI-powered terminal is available on Windows. Download Warp for Windows for free today: Windows support has been our number one request over the last year, and. We're thrilled to unveil the public preview of AI Shell! AI Shell enhances your shell with AI capabilities to facilitate your interactions with the command line.

Rev-AI is an advanced reverse shell implementation that leverages AI (DeepSeek API) to generate Linux commands based on natural language queries. It provides a secure communication channel

Warp is the platform for agentic development -- a modern terminal and cloud agent platform used by 700K+ developers at leading enterprises. Explore docs,

We're thrilled to unveil the public preview of AI Shell! AI Shell enhances your shell with AI capabilities to facilitate your interactions with the

Find out how Shell works with Artificial Intelligence: from machine learning to computer vision, from deep learning and virtual assistants to robotics.

kubectl-ai acts as an intelligent interface, translating user intent into precise Kubernetes operations, making Kubernetes management more accessible and efficient.

AI Shell enhances your shell with AI capabilities to facilitate your interactions with the command line. AI Shell create an interactive shell that can

In cloud automation workflows, AI Shell helps simplifies tasks like provisioning resources, managing infrastructure and orchestrating services

Lightweight server management & intelligent ops platform with Docker one-click deployment, batch script execution, web terminal, and AI-powered operations. - easyshell-ai/easyshell

Intelligent AI Server Shell

In this article, you'll learn how to use ShellGPT with Ollama and bring AI power directly to your shell. Guide to Installing and Setting Up ShellGPT and Ollama on TUXEDO OS Setting up

JiuwenSwarm is an intelligent AI Agent built in Python. As its name suggests, "Swarm" symbolizes multiple intelligent agents working together as efficiently as a swarm of bees, evolving

Learn how to build a high performance AI server to allow you to run large language models locally. Removing the need for subscriptions and

Next.js 16.2 ships AGENTS.md in create-next-app, browser log forwarding, dev server lock file with PID, and next-browser for AI agent debugging.

2- Yai - AI powered Terminal Assistant Yai is a smart, AI-powered terminal assistant that uses OpenAI's ChatGPT to turn natural language into

EasyShell dispatches them to agents on schedule, collects output (disk, memory, services, logs), sends it to your AI model for intelligent analysis, and lets AI decide whether the

AI-Powered Server Operations Transform your DevOps workflow with intelligent automation. Let AI write scripts, orchestrate tasks, and manage servers through natural language -- via Telegram, Discord,

With integrated Model Context Protocol (MCP) server support, native agentic capabilities, and bash-like syntax, Azure Cosmos DB Shell transforms database management into an intelligent, developer
