NEMA Standard VE 2-2006 addresses shipping, handling, storing, and installing cable tray systems; it also provides information on cable tray maintenance and system modification. This is a description of how to select, install, and support these metal or plastic frames, on which electrical wires are installed. You should consider it as a series of instructions that make the buildings resistant to. The National Electrical Manufacturers Association (NEMA) also publishes three consensus standards that apply to the proper manufacture and installation of cable trays: ANSI/NEMA-VE 1-1998, Metal Cable Tray Systems; NEMA-VE 2-1996, Metal Cable Tray Installation Guidelines; and NEMA-FG-1998. It is the first joint effort of NEMA and CSA International to put in one place standards for metal trays per both NEMA and CSA methods. Information on maintenance and system modification is also. CTION 26 05 36 CABLE TRAYS F : Record actual routing of cable tr lvanized after fabrication accordance with ASTM A123/ e plates, reducer plates, blind ends of each run, and at other points to mai ection 07 84 00 to sustain ratings when passing cable tray throu er equipment grounding conductor. standard specifies the requirements and test methods for cable trays, cable ladders, supports and their accessories to ensure complete safety of installations.

Article 392 of the NEC provides the basic requirements for installations using cable tray. The respective article for the cable type must also be followed. Table 392.10 (see Table 1) lists the type of cable that
