

Article Overview

Electra Electric in Biratnagar, Nepal, and international suppliers like Warom Technology and MINMILE provide explosion-proof distribution boxes suitable for hazardous environments.

Local Supplier in Nepal

Electra Electric is a Nepal-based electrical supplier located in Biratnagar, offering distribution boxes designed for safe and efficient power distribution. While their website primarily lists general distribution boxes, they are a key local contact for sourcing electrical enclosures and may provide guidance or custom solutions for explosion-proof requirements.

International Suppliers

- o Warom Technology Warom specializes in explosion-proof electrical equipment, including distribution boxes, control equipment, and lighting fixtures. Their products comply with international standards such as IEC, ATEX, and IECEx, making them suitable for hazardous locations in chemical, petroleum, marine, and mining industries. Warom's explosion-proof distribution boxes feature flameproof (Ex d) and increased safety (Ex e) chambers, anti-static coatings, anti-loosening fasteners, and color-coded operating panels for safe operation.
- o MINMILE MINMILE manufactures compact explosion-proof device boxes for use in chemical plants, oil refineries, offshore platforms, and military applications. Their enclosures support various mounting types, cable entries for armored or rubber cables, and integration of instruments like ammeters and voltmeters. These boxes are designed for temperature control, power supply, and maintenance in hazardous areas.

Key Considerations

- o Compliance: Ensure the boxes meet IEC, ATEX, or IECEx standards for explosion-proof certification.
- o Application: Choose boxes based on the environment--chemical, oil, offshore, or industrial.
- o Customization: Many suppliers offer custom sizes, mounting options, and cable entry configurations.
- o Durability: Look for features like anti-static coatings, flameproof chambers, and waterproof/dustproof enclosures. For sourcing in Nepal, contacting Electra Electric for local availability or importing from Warom Technology or MINMILE are practical options. These suppliers provide certified, high-quality explosion-proof distribution boxes suitable for industrial and hazardous applications.
