

Oman New Energy Data Center Construction Begins

Preview

A group of international companies has signed a joint development agreement to build a 150MW sustainable hyperscale data centre in Oman, marking a significant step in advancing the country's digital and sustainability ambitions. The Italian Pavilion at Oman Sustainability Week 2026 saw the signing of an energy-related partnership aimed at advancing sustainable infrastructure and clean energy integration in Oman. The "green data center" will have a planned capacity of 150MW and feature renewable energy and high-efficiency systems to lower its environmental impact.

We are proud to have launched the first Green Energy Data Center in partnership with Solar Wadi, delivering 1.4 MW of clean solar
