

Price List for Electrical Distribution Boxes at West African Construction Sites

Article Overview

Electrical distribution boxes for construction sites in West Africa typically range from \$50 to \$500 depending on type, capacity, and supplier.

Overview of Distribution Boxes

Electrical distribution boxes, also known as DB boards or distribution boards, are essential for safely distributing electricity across construction sites. They come in various types:

- o Populated DB Boards: Pre-wired with circuit breakers, suitable for immediate installation. Example: 12-way flush-mount boards for medium-scale sites.
- o Unpopulated DB Boards: Empty enclosures allowing custom wiring, often used for larger or specialized projects.
- o Pole Boxes and Split Meter Boxes: Used for outdoor or multi-unit construction setups. Voltage ratings typically range up to 690V, suitable for both residential and commercial construction needs .

Price Ranges

Based on supplier data and regional market trends:

- o Small 4-6 Way DB Boards: \$50-\$120
- o Medium 12-18 Way Populated Boards: \$150-\$300
- o Large Industrial or Outdoor Boards: \$300-\$500, including pole-mounted or split meter boxes Prices vary depending on material (plastic vs metal), pre-population, and brand. Imported boards may incur additional shipping or import duties in West African countries.

Suppliers and Procurement Options

- o Local Distributors: Companies like Umeme Africa Engineering supply a range of distribution boards, transformers, and meter boxes suitable for West African construction projects .
- o Regional Suppliers: South African suppliers such as Builders, ARB Electrical Wholesalers, and Light Market offer online catalogs and delivery options, which can be used for bulk procurement .
- o Online Price Comparison: Platforms like PriceCheck provide comparative pricing for different DB boards, helping to identify cost-effective options .

Recommendations

- o Assess Site Requirements: Determine the number of circuits, voltage, and whether pre-populated boards are

needed.

- o Check Local Availability: Importing from South Africa may increase costs; local distributors can reduce lead time.
- o Consider Safety Standards: Ensure boards comply with IEC or local electrical standards for construction sites.
- o Bulk Procurement: For large projects, negotiate with suppliers for discounts on multiple units. By considering these factors, construction managers in West Africa can select cost-effective and reliable distribution boxes for their projects.
