

Price list for double-layer mesh cable trays

Article Overview

Double-layer mesh cable trays typically range from \$2 to \$25 per meter, depending on material, size, and finish.

Typical Price Range

The cost of double-layer wire mesh cable trays varies widely based on material and design:

- o Galvanized steel: \$5-\$15 per meter, offering durability and moderate corrosion resistance.
- o Stainless steel: \$15-\$25 per meter, ideal for highly corrosive environments.
- o Aluminum: \$10-\$20 per meter, lightweight and rust-resistant.
- o Fiberglass or plastic trays: \$2-\$10 per meter, suitable for light loads and non-conductive applications .

Factors Affecting Price

- o Material: Steel is cost-effective for heavy-duty use, while aluminum and stainless steel are pricier but offer corrosion resistance .
- o Surface Finish: Hot-dip galvanizing (HDG) increases durability and cost, powder coating adds protection and color options, and pre-galvanized trays are cheaper but less durable outdoors .
- o Tray Type: Ladder trays are more expensive due to load capacity, while wire mesh trays are lighter and generally cheaper .
- o Size and Configuration: Larger trays or custom double-layer designs increase material usage and cost. Fittings like bends, tees, and risers are priced per piece .
- o Installation and Shipping: Labor, accessibility, and transport costs can significantly affect the total project cost .

Purchasing Tips

- o Bulk Orders: Ordering in large quantities can reduce per-meter costs.
- o Weight Considerations: If heavy load capacity is not required, opting for perforated or mesh trays can save 10-15% compared to ladder trays .
- o Supplier Comparison: Check multiple suppliers for material quality, warranty, and delivery options. Alibaba and McMaster-Carr offer a wide range of wire mesh trays with pricing details . By considering these factors, you can select a double-layer mesh cable tray that balances cost, durability, and installation requirements for your project.
