

Price of low-voltage power distribution boxes in Myanmar

Article Overview

Low-voltage complete distribution boxes in Myanmar typically range from USD 50 to USD 500 per unit, depending on capacity, features, and brand.

Price Overview

The cost of a low-voltage distribution box depends on several factors:

- o Capacity and number of circuits: Small residential boxes with 4-8 circuits are generally priced around USD 50-150, while larger commercial or industrial units with 12-36 circuits can range from USD 200-500.
- o Brand and quality: International brands like Siemens, Eaton, or Ortea tend to be more expensive than local or regional brands .
- o Features: Units with integrated RCD/RCCB protection, modular design, or multi-circuit support are priced higher due to enhanced safety and expandability .
- o Material and enclosure type: Metal-enclosed boxes are more durable and costlier than plastic enclosures.

Suppliers in Myanmar

Several companies provide low-voltage distribution boxes and related services:

- o Myanma Power Spectrum Co., Ltd. supplies low-voltage electrical equipment and can perform site surveys to recommend suitable distribution boxes .
- o Khin Maung Tun & Brothers offers a wide range of low-voltage products with next-day delivery across Myanmar .
- o Yaung Ni Oo Electric Co., Ltd. provides complete low-voltage distribution systems, including design, procurement, and installation services .
- o International suppliers like those listed on Energy XPRT serve Myanmar with low-voltage switchgear and panelboards .

Recommendations

- o Request quotations: Prices vary significantly based on specifications, so contacting suppliers directly is recommended for accurate pricing.
- o Consider installation costs: Professional installation may add to the total cost, especially for larger or complex systems.
- o Check compliance: Ensure the distribution box meets local electrical safety standards and is suitable for the intended voltage and load. By contacting these suppliers, you can obtain customized quotes for low-voltage
