Every unit meets Saudi Electrical Code (SEC) Clause 5. Standard load ratings range from 150kg/m (light-duty data routing) to 400kg/m (heavy-duty power distribution). Your acceptance of the document is an acknowledgment that it must be used for the identified purpose/application and during the period indicated. It cannot be. Specialized/Sigma Factory for Steel Products (SFSP) was first established in KSA in 1989 and has been expanding ever since through a variety of products and through its geographical presence. Production at the factory is observed using modern practices of manufacturing methods in the steel. Our Cable Tray System offers a robust and flexible solution to safely route, protect, and support electrical and communication cables. Engineered with durability, adaptability, and ease of installation in mind, our systems cater to various requirements, ensuring seamless cable management for any. Cable Tray is used in electrical power & lighting systems to ensure reliability, performance, and compliance. Matkel supplies engineered cable tray systems built for extreme operational loads and harsh environmental conditions. SPECIFICATION FOR UNIT SUBSTATIONS UP TO 36 KV.

Schneider Electric cable trays offer a high grade of cable protection, shielding the cables from external

Source SASO-certified cable trays in KSA. Heavy-duty galvanized steel, FRP, and ladder types. SEC compliant. Request a quote or
