

Article Overview

Spanish industrial distribution boxes are available in IP65-rated enclosures made from high-quality ABS, polycarbonate, or stainless steel, with modular capacities ranging from 3 to 54 modules and compliance with ITC and REBT standards.

Materials and Construction

- o Plastic Enclosures: Made from halogen-free ABS or polycarbonate with UV protection, suitable for indoor and outdoor use. Transparent windows are available for monitoring internal components (IDE Ecology series) .
- o Stainless Steel Enclosures: Manufactured in AISI 304L or 316L for corrosion resistance and durability, especially for hazardous or extreme environments (Atex Delvalle) .
- o Robust Industrial Design: Designed to withstand demanding industrial conditions, ensuring long-term durability and secure installation (Solera Indubox) .

Protection Ratings

- o IP65: Dust-tight and protected against water jets, suitable for both indoor and outdoor industrial applications .
- o Explosion-Proof Options: Atex and IECEx certified enclosures for hazardous areas (Zones 1, 2, 21, 22), capable of withstanding extreme temperatures and climatic conditions .

Modular Capacity and Configuration

- o Plastic Surface Enclosures: Available in 4, 6, 8, 12, 18, 24, 36, and 54 module configurations, with TH35x7.5 symmetrical rails for DIN rail-mounted components .
- o Industrial Boxes: Configurations range from 3 to 48 modules, allowing flexibility for various industrial electrical installations .
- o Customizable Layouts: Many manufacturers offer tailor-made solutions to meet specific installation requirements, including single-phase or three-phase supply, indirect or direct supply, and integration with STAR socket boxes .

Standards Compliance

- o ITC and REBT Standards: Ensures safety, reliability, and compatibility with Spanish electrical regulations .
- o Iberdrola Norms: Some boxes are designed specifically for compliance with Iberdrola's direct and indirect supply requirements .

Additional Features

- o Transparent Windows: Allow visual inspection without opening the enclosure .
- o Pre-Assembled Options: Many enclosures are supplied fully assembled for quick installation .
- o Custom Control Stations: For industrial and hazardous applications, control elements such as push buttons, voltmeters, and ammeters can be integrated directly into the enclosure . Spanish industrial distribution boxes provide a versatile, durable, and standards-compliant solution for electrical distribution in both standard and hazardous industrial environments, with options for customization, modularity, and robust protection.

We design and manufacture high-resistance electrical enclosures for demanding industrial environments. Made in Europe,

IP67-serie Industrial distribution boxes EDS Accessories D fuse-switch disconnectors and fuse bases NH fuse-switch disconnectors

GSDB-4030 400x300x190 3 Phase Service Connection Distribution Box/ ABC Distribution Box 11.

Custom solutions for residential, commercial, and industrial applications. Offering ABS and stainless steel

Manufacturer of custom stainless steel electrical enclosures and boxes: AISI 304/316, IP65/IP68 and

Industrial Enclosures and switch cabinets IP65 wall-mounted enclosures MAGNA Wired enclosures with sockets and IP54

IDE: ENERTRONIC SA distributor of IDE offers the products of the Spanish manufacturer that are intended for both the electricity

There are many specifications and models of Distribution box. The following are some

Installation instructions Installation instructions: Ecology Distribution boxes Installation instructions: 4 modules Ecology Distribution
