

There is a flash of electricity in the household electrical distribution box

Preview

Sparkling outlets can be normal due to brief electrical arcing -- but not always. Loose wires or old outlets are common causes of dangerous sparks. Moisture or damaged plugs should be dealt with immediately. In this blog post, we'll delve into the top five most common breaker box problems and how to troubleshoot them effectively. Electrical arcing, sometimes called an arc flash, occurs when electricity flows or discharges along an unintended path and jumps to a nearby grounded object. Arc faults, caused by low, erratic electrical flows, commonly occur due to frayed or exposed wires and can occur anywhere in your home. Flickering Lights & Intermittent Electrical Power Loss Diagnose & fix flickering or dimming lights or lost electricity.
