

Article Overview

A transparent integrated distribution box is an electrical enclosure with a clear cover that allows visual inspection of circuits while providing protection against dust, water, and impact.

Key Features

Material and Construction: Most transparent distribution boxes are made from durable ABS plastic, which is resistant to impact, UV damage, and environmental wear, ensuring long-term reliability . **Protection Rating:** Commonly rated IP65, these boxes are dust-tight and protected against water jets, making them suitable for both indoor and outdoor installations . Some models, like the IP40-rated boxes, are designed for indoor residential or commercial use . **Transparency:** The clear lid allows users to inspect breakers and circuits without opening the box, improving safety and convenience during maintenance . **Integrated Components:** Many boxes come with neutral and earth bars, DIN rails, and pre-fitted mounting brackets, facilitating quick and organized installation . **Modularity and Capacity:** Options range from 2-way to 36-way modules, supporting both small-scale residential setups and larger commercial or industrial applications .

Applications

Transparent integrated distribution boxes are versatile and can be used in:

- o Residential buildings for safe and visible circuit management
- o Commercial spaces like offices, shops, and hotels
- o Industrial environments requiring robust protection against dust and moisture
- o Workshops and power stations where frequent inspection is needed without opening the enclosure

Benefits

- o **Enhanced Safety:** Reduces the risk of accidental contact with live components
- o **Ease of Maintenance:** Quick visual checks without disassembly
- o **Durability:** Resistant to environmental factors and mechanical impact
- o **Flexible Installation:** Surface-mounted or flush-mounted options available, adaptable to walls or prefabricated panels

Summary

A transparent integrated distribution box combines protection, visibility, and modularity, making it ideal for modern electrical installations where safety, convenience, and compliance with standards are essential. Models vary in size, module capacity, and IP rating, allowing selection based on specific project requirements .

Transparent Integrated Distribution Box

As cities evolve into smart grids, transparent distribution boxes are integrated into advanced power monitoring and

Product Description Features: Made of plastic material, this distribution box is and sturdy. This distribution box is designed for 5-8

QWORK 2 Way Circuit Breaker MCB Distribution Protection Box, IP65 Waterproof ABS Plastic Breaker Electrical Box and

Product Name: Distribution Protection Box (HT-2-WAY), Size: 120MM*90MM*54MM High quality material: PC/ABS alloy plastic,

Configure fuse and distribution box surface-mounted individually In addition to the high quality, the modern designs and the

The distribution box can effectively reduce external interference of the current. As a professional seller, we provide high

Discover the TSM Series surface mounted plastic distribution box with transparent PC cover, ABS enclosure, DIN rail support, and

HT Series Waterproof Distribution Box. ABS plastic with a clear lid, this IP65-rated breaker box safeguards against dust, water, and

TME403020T Plastic distribution cabinet with transparent door HxWxD=400x300x195mm, IP65, IK10, 1000V AC/DC, RAL7035

Distribution Boxes Transparent Door Products may differ in size, colour and appearance to those shown. If you require further

This distribution box houses and protects electrical components. Its transparent cover allows for easy

MULTIFUNCTIONAL: This distribution box is designed for 3-4 ways circuit breaker, can be widely used.
