

What is a fireproof CT cable tray

Preview

Fireproof cable trays are specialized structures designed to support and protect cables. In addition, the use of high environmental protection pigment makes the fireproof coating on the cable tray non-toxic, with no pollution, and has. FireResistant Solutions provides cable tray covering and fire-protection systems designed to safeguard electrical and data infrastructure in commercial and multifamily buildings. These systems prevent fire and smoke from spreading through open cable pathways, maintaining circuit integrity and code. The mostly combustible cable sheaths and insulation allow a fire to spread along the cable at rapid speed. Our tested solutions for cable fire protection can delay the spread of fire in order to minimise the damage sustained. Where cables pass through shafts, walls, slabs, or enter electrical panels or cabinets, openings shall be tightly sealed. Cablofil cable tray is the preferred choice for the cable containment of low and high voltage electric cables where fire resistance is crucial - this includes cable basket tray systems for Prysmian FP (FP400 and FP600) and Draka Firetuf type cables. Cablofil fire resistant and fire proof cable.
