

Where in Central Asia can I buy a network server rack

Article Overview

You can purchase network server racks in Central Asia through regional distributors, local IT suppliers, or by importing from Chinese manufacturers and global vendors.

Local and Regional Options

While Central Asia does not have a large number of dedicated server rack manufacturers, several IT equipment suppliers and distributors in major cities like Almaty (Kazakhstan), Tashkent (Uzbekistan), and Bishkek (Kyrgyzstan) often stock server racks and network cabinets. These suppliers typically carry standard 19-inch racks, wall-mounted cabinets, and open-frame racks suitable for small to medium data centers.

Importing from China

China is a major hub for server rack manufacturing, with companies like Gcabling, Ship Group, LE, and Topwelltech offering a wide range of network cabinets, wall-mounted racks, and customized solutions. These manufacturers provide OEM/ODM services, allowing you to order racks tailored to your specifications. Shipping to Central Asian countries is feasible via freight services, and many suppliers can assist with logistics and customs documentation.

Global Vendors

International brands such as Hewlett Packard Enterprise (HPE), Dell, Lenovo, and Cisco also offer server racks that can be shipped to Central Asia. HPE, for example, provides G2 Advanced and Enterprise Series racks with high load capacity, cable management, and airflow optimization, which can be configured and delivered to your site. Contacting regional distributors or authorized resellers of these brands in Central Asia can simplify procurement and after-sales support.

Practical Tips

- o Check compatibility: Ensure the rack meets your equipment size, weight, and cooling requirements.
- o Consider shipping and customs: Importing from China or other countries may involve additional costs and lead times.
- o Look for local support: Vendors with regional offices or partners can provide installation guidance and warranty services.
- o Customization: If you need specific dimensions or features, Chinese manufacturers often provide tailored solutions. By combining local suppliers for immediate needs and Chinese or global manufacturers for specialized or high-capacity racks, you can efficiently source network server racks for your IT infrastructure in
