

Which French fiberglass cable tray manufacturer to choose

Article Overview

Oglaend System and OB Profils are notable French suppliers offering fiberglass (FRP/GRP) cable trays suitable for industrial and offshore applications.

Oglaend System

Oglaend System produces a wide range of cable tray systems, including fiberglass (FRP/GRP) composites, designed for both offshore and onshore projects. Their trays support electrical cables, tubing, and instrumentation, and are available in various heights and widths to accommodate different load requirements. The trays feature slot patterns for efficient cable positioning and easy installation of clamps and ties, complemented by a full range of brackets and fittings for stable configurations .

OB Profils

OB Profils, based in Prunay-Le-Gillon, France, manufactures and markets cable trays and supports for all building types. While their primary materials include aluminium, stainless steel, and coated metals, they offer custom solutions that can be adapted to specific project requirements. OB Profils provides a comprehensive range of accessories, supports, and connection elements, ensuring flexibility for complex installations. Their logistics system supports both domestic and international deliveries .

Other French Manufacturers

Several other French companies are recognized for cable tray production, including Niedax Group, EAE Electric, Cablofil (part of Legrand), Gewiss, and Legrand. While these companies primarily focus on metal and wire mesh trays, some may offer composite or FRP options upon request, particularly for specialized industrial or corrosive environments .

Considerations for Choosing Fiberglass Cable Trays

- o Corrosion resistance: FRP/GRP trays are ideal for chemical, offshore, or humid environments.
- o Load capacity: Ensure the tray dimensions and material strength meet project requirements.
- o Customization: Some manufacturers, like OB Profils, provide tailor-made solutions for unique site configurations.
- o Compliance and standards: Verify that trays meet relevant French and international electrical and safety standards. For projects requiring fiberglass cable trays in France, Oglaend System is a primary supplier, while OB Profils and other major French manufacturers can provide custom or complementary solutions. Contacting these companies directly will help determine availability, specifications, and export options.
